PROJECTS

Spotify - <https://github.com/dakhinkar/Spotify>

Currently, everyone uses a music player to listen to music. So the idea is to build our music application that takes the tracks, albums, and artist details from the Spotify API to play the song.

Tech stack: React Js, React-bootstrap

Project Output Link : <https://my-spotify-01.netlify.app>

Expense Book - <https://github.com/dakhinkar/Expense-Book>

Users can add monthly expense details, or cancel adding details. To show up the year-wise expense details, we have also filtered year-wise expenses. And a Graph that helps to identify the month-wise expense details.

Tech stack: React Js, JavaScript, CSS, HTML.

Project Output Link : <https://expense-books.netlify.app/>

Picture Gallery - <https://github.com/dakhinkar/Picture-Gallery>

The picture gallery app uses the open-source photo API to get the photo details. I use the Axios library to fetch the details from API and bootstrap container to photo with more information.

Tech stack: React Js, JavaScript, React-bootstrap, router Dom

Project Output Link : <https://photo-shop.netlify.app/>

Basic Calculator - <https://github.com/dakhinkar/Calculator-js>

Build a web application that will assist users with arithmetic calculations. It has a number of numeric buttons, arithmetic operation buttons, and a special button.

Tech stack: HTML, CSS, JavaScript

Project Output Link : <https://dakhinkar.github.io/Calculator-js/>
